Katten

Katten Muchin Rosenman LLP

The Changing Healthcare Landscape

- Consolidation of market
 - Hospital mergers
 - Practice acquisitions
- Provider margins are under attack
 - Reductions in Medicare/Medicaid reimbursement
 - Higher costs
 - Private payer reductions
- New models of provider integration are emerging
 - Co-management arrangements
 - Patient centered medical home
 - ACOs

The Changing Healthcare Landscape

(cont'd)

- Shift from “Volume to Value” as a basis of reimbursement
 - Pay for performance
 - ACO/ACE quality metrics
 - CMS Core Set of Children’s Health Care Quality Measures
 - Value Based Purchasing
 - Reduced or denied reimbursement for:
 - Hospital acquired conditions
 - Never events – (Billing Medicaid for a never event is considered a false claim)
 - Readmissions within 30 days

The Changing Healthcare Landscape

(cont'd)

- Never Events
 - Surgery on wrong body part
 - Surgery on wrong patient
 - Wrong surgery on a patient
 - Death/disability associated with use of contaminated drugs
 - Patient suicide or attempted suicide resulting in disability
 - Death/disability associated with medication error

Katten

Katten Muchin Rosenman LLP

The Changing Healthcare Landscape

(cont'd)

- Infant discharged to wrong person
- Abduction of a patient
- Death or serious disability (kernicterus) associated with failure to identify and treat hyperbilirubinemia in neonates

Katten

Katten Muchin Rosenman LLP

The Changing Healthcare Landscape

(cont'd)

- Hospital Acquired Conditions
 - Foreign object left in patient after surgery
 - Death/disability associated with intravascular air embolism
 - Death/disability associated with incompatible blood
 - Stage 3 or 4 pressure ulcers after admission
- Hospital Quality Standards
 - Specifications Manual for National Hospital Independent Quality Measures (CMS and The Joint Commission)
 - Accountability Measures (heart attack care, heart failure care, pneumonia care, surgical care, children's asthma care, inpatient psychiatric care, venous thromboembolism care, stroke care, perinatal care)

Katten

Katten Muchin Rosenman LLP

The Changing Healthcare Landscape

(cont'd)

- Core Set of Medicaid/CHIP Children's Health Care Quality Measures – 22 Measures
 - Preventive dental services
 - Well child visits
 - Access to primary care practitioners
 - Testing
 - Prenatal care

Katten

Katten Muchin Rosenman LLP

The Changing Healthcare Landscape

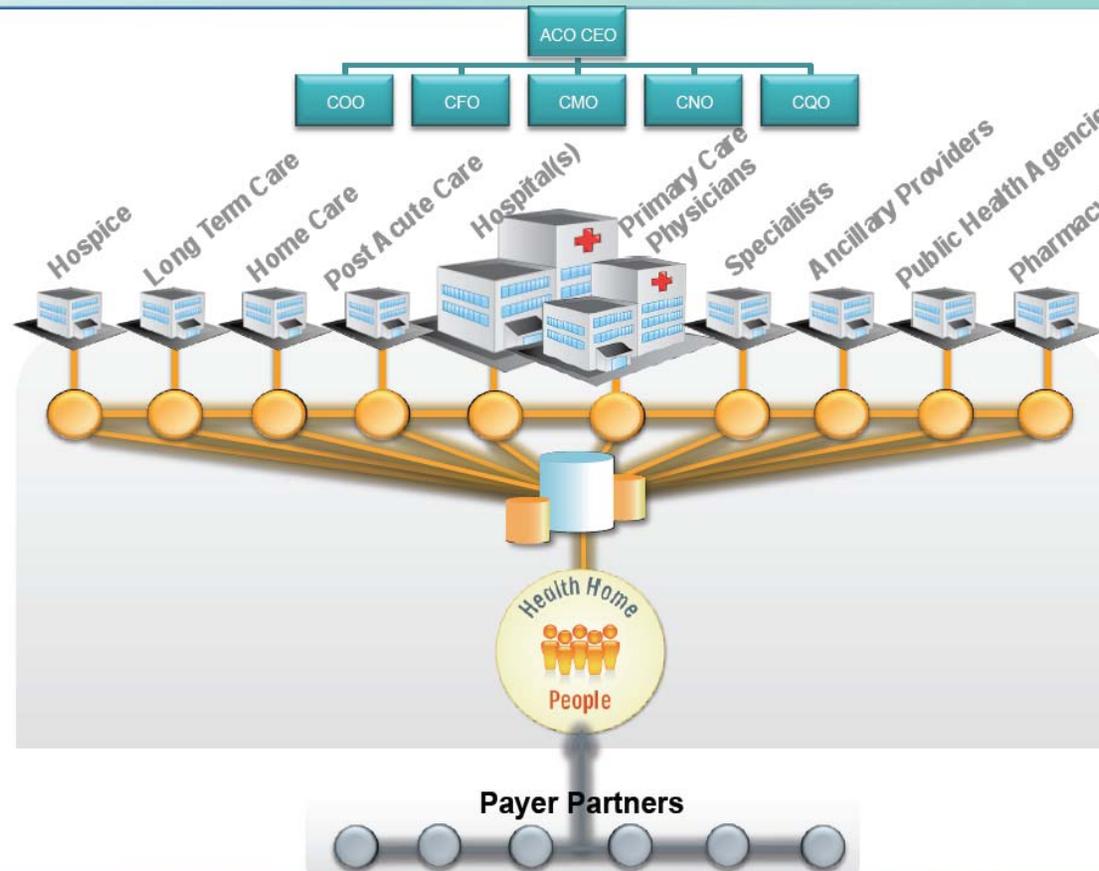

(cont'd)

- NCQA's Physician and Quality Certification
- Leapfrog Group
- National Quality Forum
- Agency for Healthcare Research and Quality

Katten

Katten Muchin Rosenman LLP

Complete view of an operational ACO

PREMIER

Transforming Healthcare Together™

Katten

Katten Muchin Rosenman LLP

Impact on Board and Corporate Responsibility

- Traditional corporate duties
 - Duty of care
 - Duty of loyalty
 - Must act in good faith as would an ordinary prudent person and in a manner which they reasonably believe is in the best interests of the corporation
 - Business judgment rule
- Doctrine of Corporate Negligence

Impact on Board and Corporate Responsibility (cont'd)

- Medicare/Medicaid Conditions of Participation (42 C.F.R. Section 482.12)
- The Joint Commission Hospital Accreditation Standards (See LD.01.03.01)
- “Resources for Health Care Board of Directors on Corporate Responsibility and Health Care Quality (Joint White Paper of OIG/AHHA)”

Corporate Responsibility in Health Care Quality

- The OIG and AHHA collaborated on a publication titled “Resource for Health Care Boards of Directors on Corporate Responsibility and Health Care Quality”
- Was published “for the specific purpose of identifying the role and responsibility of corporate boards and management with respect to its fiduciary obligations to meet its charitable mission and legal responsibilities to provide health care quality services”
- Cites to key questions reflective of standards against which hospital boards will be measured

Corporate Responsibility in Health Care Quality (cont'd)

- What are the goals of the organization's quality improvement program?
- What metrics and benchmarks are used to measure progress towards each of the performance goals? How is each goal specifically linked to management accountability?
- How does the organization measure and improve the quality of patient/resident care? Who are the key management and clinical leaders responsible for these quality and safety programs?
- How are the organization's quality assessment and improvement processes integrated into overall corporate policies and operations? Are clinical quality standards supported by operational policies? How does management implement and enforce these policies? What internal controls exist to monitor and report on quality metrics?

Corporate Responsibility in Health Care Quality (cont'd)

- Does the board have a formal orientation and continuing education process that helps members appreciate external quality of patient safety requirements? Does the board include members with expertise in patient safety and quality improvement issues?
- What information is essential to the board's ability to understand and evaluate the organization's quality assessment and performance improvement programs? Once these performance metrics and benchmarks are established, how frequently does the board receive reports about the quality improvement effort?

Corporate Responsibility in Health Care Quality (cont'd)

- Are human and other resources adequate to support patient safety and clinical quality? How are proposed changes in resource allocation evaluated from the perspective of clinical quality and patient care? Are systems in place to provide adequate resources to account for differences in patient acuity and care needs?
- Do to the organization's competency assessment and training, credentialing and peer review processes adequately recognize the necessary focus on clinical quality and patient safety issues?
- How are these "adverse patient events" and other medical errors identified, analyzed, reported and incorporated into the organization's performance improvement activities? How do management and the board address quality deficiencies without unnecessarily increasing the organization's liability exposure?

Quality Enforcement Efforts

- **False Claims Act**

- The OIG has identified that its principal enforcement tools include allegations of violations of the False Claims Act, use of corporate integrity agreements, including the use of external quality of care monitors, as well as civil fines and, in extreme circumstances, exclusion from the Medicare program
- The OIG has made the following statement:

“To hold responsible individuals accountable and to protect additional beneficiaries from harm, the OIG excludes from participation in federal health care programs individuals and entities whose conduct results in poor care. In enforcement actions against corporate entities, . . . OIG places particular emphasis on high level officials, such as owners and chief executive officers. . . .”

Katten

Katten Muchin Rosenman LLP

Quality Enforcement Efforts (cont'd)

- Grand Jury indicted a Michigan hospital based on its failure to properly investigate medically unnecessary pain management procedures performed by a physician on the medical staff.
- A California hospital paid \$59.5 million to settle a civil False Claims Act allegation that the hospital inadequately performed credentialing and peer review of cardiologists on its staff who perform medically unnecessary invasive cardiac procedures.

Quality Enforcement Efforts (cont'd)

- In a settlement with Tenet Health Care Corporation and pursuant to a Corporate Integrity Agreement, a hospital board was required to:
 - Review and oversee the performance of the compliance staff.
 - Annually review the effectiveness of the compliance program.
 - Engage an independent compliance consultant to assist the board and review an oversight of tenant's compliance activities.
 - Submit a resolution summarizing its compliance efforts with the CIA and federal health care program requirements, particularly those relating to delivery of quality care.
- A Pennsylvania hospital entered into a \$200,000 civil False Claims Act settlement to resolve substandard care allegations related to the improper use of restraints.

Katten

Katten Muchin Rosenman LLP

Quality Enforcement Efforts (cont'd)

- **Rogers v. Azmat (2010)**

- DOJ interviewed in a False Claims Act lawsuit alleging that Satilla Regional Medical Center and Dr. Najam Azmat submitted claims for medical substandard and unnecessary services to Medicare and Medicaid . The complaint alleges, among other things, that the defendants submitted claims for medical procedures performed by Dr. Azmat in Satilla's Heart Center that the physician was neither qualified nr properly credentialed to perform. As a result, at least one patient died and others were seriously injured.

Quality Enforcement Efforts (cont'd)

- The complaint states that Satilla placed Dr. Azmat on staff even after learning that the hospital where he previously worked had restricted his privileges as a result of a high complication rate on his surgical procedures. The complaint also states that after Dr. Azmat joined the Satilla staff, the hospital management allowed him to perform endovascular procedures in the hospital's Heart Center even though he lacked experience in performing such procedures and did not have privileges to perform them.
- The complaint further states that the nurses in Satilla's Heart Center recognized that Dr. Azmat was incompetent to perform endovascular procedures and repeatedly raised concerns with hospital management. Despite the nurse's complaints and Dr. Azmat's high complication rate, Satilla's management continued to allow him to perform endovascular procedures and to bill federal health care programs for these services.

Katten

Katten Muchin Rosenman LLP

Quality Enforcement Efforts (cont'd)

- Increased enforcement
 - 2012 OIG Work Plan
 - Reliability of hospital-reported quality measures data
 - Review of Medicaid payments for HACs and never events
 - Acute-care inpatient transfers to inpatient hospice care
 - Safety and quality of surgeries and procedures in surgicenters and hospital outpatient departments

Quality Enforcement Efforts (cont'd)

- Hospital reporting of adverse events
- Hospital same-day readmissions
- Review effectiveness of PSO programs
- ❖ 2014 016 Work Plan
 - Atypical antipsychotic drug prescribed for children in Medicaid
 - Access to pediatric dental care for children enrolled in Medicaid
 - Utilization of preventative screening services for children enrolled in Medicaid
 - Physician privileging

Quality Enforcement Efforts (cont'd)

- January, 2012 OIG Report: “Hospital Incident Reporting Systems Do Not Capture Most Patient Harm”
 - All hospitals have incident reporting systems to capture events and are heavily relied on to identify problems
 - These systems provide incomplete information about how events occur
 - Of the events experienced by Medicare/Medicaid beneficiaries, hospital incident reporting systems only captured an estimated 14% due to events that staff did not perceive as reportable or were simply not reported
 - Accrediting bodies only review incident reports and outcomes but not the methods used to track errors and adverse events

Enhanced Exposure to Malpractice, Apparent Agency and Corporate Negligence Liability

- Hospital, along with its medical staff, is required to exercise reasonable care to make sure that physicians applying to the medical staff or seeking reappointment are competent and qualified to exercise the requested clinical privileges. If the hospital knew or should have known that a physician is not qualified and the physician injures a patient through an act of negligence, the hospital can be found separately liable for the negligent credentialing of this physician [Doctrine of Corporate Negligence]
- Doctrine also applies to managed care organizations such as PHOs and IPAs, medical groups and most likely will be extended to ACOs/CINs

Enhanced Exposure to Malpractice, Apparent Agency and Corporate Negligence Liability (cont'd)

- Emphasis on Pay for Performance (“P4P”) and expected or required quality outcomes as determined by public and private payors
- Adverse Events, HACs, quality metrics, value based purchasing standards can arguably be used as standards of care – all are increasing
- Greater transparency to general public via hospital rankings, published costs and outcomes, accreditation status, state profiling of physicians, etc. – will there be a developing “network” standard of care?
- 30 million new insureds entering the market, many with higher morbidity/mortality
- New sites of care – patient centered medical homes, clinics, outreach to community hospitals

Enhanced Exposure to Malpractice, Apparent Agency and Corporate Negligence Liability (cont'd)

- Liability associated with poor transitions of care
- Likely increase in apparent agency claims due to patient perception that continuum of care services are being advertised, marketed and delivered under ACO/CIN branded name
- Credentialing and privileging of all practitioners, i.e., physicians, APNs, PAs, technicians, telemedicine, becoming more complex and difficult to monitor

Enhanced Exposure to Malpractice, Apparent Agency and Corporate Negligence Liability (cont'd)

- Some questions associated with credentialing and privileging responsibilities:
 - How are core privileges determined?
 - Based on what criteria does hospital grant more specialized privileges?
 - Are ACO/CIN and hospital practices and standards consistent with those of peer networks?
 - Were any exceptions to criteria made and, if so, on what basis?

Enhanced Exposure to Malpractice, Apparent Agency and Corporate Negligence Liability (cont'd)

- Has each of your department's adopted criteria which they are measuring as part of FPPE or OPPE obligations such as length of stay patterns or morbidity and mortality data?
- Has system incorporated VBP, ACO metrics, P4P, CMS Children's Core Quality Measures and peer metrics into its credentialing/privileging procedure?
- Is system asking for quality score cards generated by other hospitals, surgicenters, payors?
- Is information being collected, evaluated and reported back to each provider?
- Are meetings set up with providers to review quality score cards and are reasonable remedial measures being taken?
- Are you monitoring and tracking performance throughout the system?

Enhanced Exposure to Malpractice, Apparent Agency and Corporate Negligence Liability (cont'd)

- Are you enforcing standards?
- With respect to apparent agency arrangements, how are services being marketed and delivered?
- Is system disclosing to patient/insureds the nature of its business, contract, joint venture relationships with independent providers?
- Are clinical, quality improvement, credentialing standards being developed at the corporate parent level?
- What responses to 10 corporate board questions posed in OIG/AHLA white paper?

Challenges to Decision to Exclude/ Terminate Based on Poor Performance

- Because the failure of a provider to meet a quality metrics standard now has a direct adverse impact on a hospital's or system's reimbursement, provider's failure to adjust and improve performance requires imposition of remedial measures which can include termination from managed care plans, participation in one or more delivery sites, the medical staff or the ACO/CIN
- Physician performance and impact on cost containment also must come under closer scrutiny and may result in similar disciplinary action even if quality is acceptable
- "Economic credentialing" is now more of a reality than ever before

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

- More hospitals are now excluding practitioners at the pre-application/application stage based on quality/utilization scorecard and competitive factors
- **Antitrust**
 - Exclusive contracts for hospital based and non-hospital based services
 - Decisions should be Board driven

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

- Challenges are not likely to succeed but what impact on current providers?
- Should base decisions on strong quality/economic grounds on which to support Board decision
- Adoption of conflict of interest or similar policy that bars new applicants or terminates existing providers from membership if they have a financial, economic or employment relationship with a competing entity
- Easier to implement, enforce and defend for initial applicants if supported by objective facts
- Application to existing “medical staff” versus “ACO/ CIN staff” members is much more difficult. At a minimum a hearing needs to be provided (See Murphy vs. Baptist Hospital)

Katten

KattenMuchinRosenman LLP

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

■ Recommendations

- All exclusive/recruitment/development plans should be Board driven albeit with physician involvement
- Any physician participation should be in the form of a “recommendation” – should not be allowed to veto or make final decision
- Decisions should be based on objective and quantifiable information fully reviewed and vetted
- Decisions and standards should be implemented, where possible, through medical staff bylaws, rules, regs, or policies or board policies
- Any adopted policy must evaluate impact on prospective and current members on medical, allied and ACO/CIN staffs
- Need to incorporate standards into employment/independent contractor agreements

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

■ Title VII Claims

- Title VII makes it “an unlawful employment practice for an employer . . . To discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment because of such individual’s race, color, religion, sex or national origin.” (42 U.S.C. § 2000e – 2(a)(1))
- This provision applies to acts of discrimination, such as termination, and acts that create a hostile work environment
- As a general rule, independent members of the medical staff, even practice groups with an exclusive contract with the hospital, are not deemed to be “employees” under Title VII

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

- However, in Solomon v. Our Lady of Victory Hospital (Western District, N.Y., No. 1:99-cv-48 (4/3/12) a federal district court, on remand from the Second Circuit, held that although Dr. Solomon was an independent member of the medical staff, the fact that she was subject to a supervision under hospital's quality assurance program and required to undergo a three month re-education program and mentoring program presented a genuine issue of material fact as to whether she should be treated as an employee under the thirteen factor test enunciated by the U.S. Supreme Court in Community for Creative Non-Violence v. Reid (490 U.S. 730 (1989))

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

- Second Circuit had held that while hospital policies that merely reflected professional and governmental standards that when imposed, establish an employer/employee relationship under Title VII, these standards as applied to Dr. Solomon may have been driven by maximizing revenue and/or in retaliation for her complaints of harassment
- Although the hospital argued that its policies and review of plaintiff's cases were driven, if not required by, state and federal law, because the plaintiff argued that her cases were subjected to greater scrutiny due to her complaints about sexual harassment, there was a genuine issue of material fact as to whether the extent of the hospital's control of her performance as to allow the Title VII claim to go forward

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

■ Recommendations

- Systems need to incorporate quality utilization metrics into bylaws, rules, regs, policies and contracts and continuously update
- Standards need to be uniformly applied to independents and employees
- Need to address whether termination of employed provider does or does not trigger a hearing under the bylaws – HCQIA immunity issue

Challenges to Decision to Exclude/ Terminate Based on Poor Performance (cont'd)

- Joint Commission takes the position that termination of the medical staff membership and clinical privileges of an employed physician requires that they be entitled to hearing rights if based on quality of care issues
- No Data Bank report required for an employed practitioner who is not terminated based on a professional review action but remember HCQIA does not apply to discrimination claims

Additional Recommendations

- A failure to incorporate and comply with ACO, VBP and other developing standards, including a pattern of HACs and Never Events, may also have a direct or indirect impact on provider responsibilities:
 - Accreditation standards
 - Doctrine of corporate negligence and related civil liability theories
 - DOJ/OIG expectations on board responsibility for delivering quality health care services which could trigger False Claims Act exposure (Azmat case)

Additional Recommendations (cont'd)

- Providers therefore need to incorporate these quality metrics and standards into their policies and procedures
- Standards need to be developed that track performance and ensure that they are communicated to providers and then monitored for compliance
- Providers need to receive periodic reports regarding their individual and comparative performances

Additional Recommendations (cont'd)

- Remedial action plans need to be developed that are designed to assist providers in meeting standards but can include the ability to suspend or terminate participation
- Performance results should be taken into consideration at the time of appointment, reappointment and contract renewal, and some internal administrative process/fair hearing for participants who are excluded should be provided
- It is important that provider evaluate its processes and procedures, reports, analyses, etc., so as to maximize available confidentiality and immunity protections under state and federal law (e.g., participation in a Patient Safety Organization under Patient Safety and Quality Improvement Act of 2005).
- Patient Safety Organization Overview – A Legal Perspective, October 3, 2013
<http://www.kattenlaw.com/36376>
- Patient Safety Organizations
To Participate or Not: That is the question, April 30, 2010
http://kattenlaw.com/files/21297_Callahan_CHRMS_4-30-10.pdf

Additional Recommendations (cont'd)

- Compliance plans need to be updated or prepared which reflect the provider's commitment to improving quality as per the areas identified by the OIG
 - Corporate Compliance Plan
 - Stark, Anti-Kickback, CMP
 - ❖ Government Investigations, November 11, 2013
<http://www.kattenlaw.com/36616>
 - HIPAA Compliance Plan
 - Practical Guidance and Proposed Solutions in Response to HIPAA Omnibus Final Rule, February 21, 2013

 - Credentialing/Confidentiality Compliance Plan

Some Remaining Questions (cont'd)

1. Is or can an ACO/CIN be a health care entity for HCQIA query, reporting and immunity purposes?
2. Under what circumstances can an ACO/CIN be considered a “provider” under the Patient Safety Act for purposes of participating in a patient safety organization (“PSO”)?
3. Is an ACO/CIN eligible for or what criteria must be met in order to qualify for state confidentiality/immunity protections?
4. What risks, if any, are there if different credentialing/privileging/peer review standards are developed for ACOs/CINs versus hospitals?

Some Remaining Questions (cont'd)

5. Can an ACO/CIN be held liable under negligent credentialing/corporate negligence/apparent agency or related liability principles?
6. How does an ACO/CIN best incorporate/implement ACO/CIN quality metrics, value based purchasing and similar quality standards as part of its credentialing/privileging/ peer review procedures?
7. Does the sharing of peer review, credentialing or otherwise protected information by and between a hospital/ACO/CIN and other providers in the ACO/CIN adversely affect confidentiality protections? What are ways to structure information sharing arrangements in order to maximize confidentiality protections?

Some Remaining Questions (cont'd)

8. How will an ACO/CIN balance the requirement to provide quality and utilization data to payers against the need or preference to keep certain information confidential?
9. Should hearing procedures be the same for ACOs/CINs and hospitals or should and can they be more streamlined? Can they be modified and still maintain HCQIA and other immunity protections?

Some Remaining Questions (cont'd)

10. Will or should the standards for remedial/corrective action be different, i.e., should overutilization or failure to satisfy quality metric standards, which in turn can reduce shared savings or other forms of reimbursement, serve as a basis for action, including termination?
11. What should be the inter-relationship between ACO/CIN and medical staff/AHP membership and ACO/CIN membership? Should removal from one result in removal from the other?
