

Young James Kim

Registered Patent Agent

Intellectual Property

Washington, DC Office | +1.202.625.3732

young.kim@katten.com

As a registered patent agent, Young James Kim helps clients in patent prosecution of their most important technologies. James has a doctorate in physics and engineering experience in the semiconductor, display device and optical communication industries. He also has built computer programs for simulations and industrial applications.

Patent prosecution for critical technologies

Clients rely on James to obtain patent rights to the inventions that are critical for their businesses. He has handled patent prosecution for electrical art, semiconductors, optical systems, display devices, medical devices, renewable energy sources, computer algorithms and electronic/electrical devices.
