Block Release: 9/13/17

Description:

This meeting offers both didactic and interactive presentations for healthcare professionals, risk managers and hospital leaders. Nationally recognized speakers will share successful strategies and tools to minimize risk and improve patient safety in the hospital and ambulatory setting.

Objectives:

Participants will be able to:

- Describe how reducing burnout in healthcare providers results in improved quality of care, patient safety and lower turnover rates.
- List best risk management practices to protect peer review documents from discovery.
- Describe risk management issues involving transgender persons, and identify risk based interventions that reduce health disparities and increase quality of services to the transgender community.
- Discuss how sharing clinical notes with patients can empower patients, families, and caregivers to feel more in control of health care decisions, and improve the quality and safety of care.
